Scientel to Introduce a Small Business Big Data Solution.

Scientel will introduce a powerful personal and Small Business Big Data solution at the 2015 NoSQL Now Conference, August 18-20 at the Mcenery Convention Center in San Jose, CA. where they will be participating as a Silver Sponsor.

Norman Kutemperor, Scientel's award-winning IT Technology CEO of the Year will introduce 'My little Big Data™' a simple-to-use, plug-n-play personal computer that doubles as a small server for Big Data content management with a Terabyte of data.

"We are pleased to be introducing this fully configured PC utilizing the amazing Gensonix Polymorphic NoSQL Database, which provides unbelievable speed and performance. It is also one of the smallest form factor units available in the market today measuring only 4.5 inches by 4.3 inches by 2 inches in size".

Individuals and Small businesses must manage data that is doubling in volume every three years and process Big Data in its high volume and velocity to remain competitive. Scientel's new device allows the user to manage all varieties of content such as word files, pdfs, pictures, music, videos, emails, text files, PowerPoint files, even analytical files inundating today' PC's, Tablets and personal devices. My little Big Data also stores any type of digital content like compressed files, small database files, etc. making it an excellent archive option.
